endothelial cell differentiation

endothelium development

positive regulation of vasculature development

positive regulation of angiogenesis

sprouting angiogenesis

regulation of vasculature development

regulation of angiogenesis

regulation of endothelial cell migration

tissue migration

regulation of epithelial cell migration

negative regulation of cell migration

positive regulation of cell adhesion

epithelium migration

epithelial cell proliferation

epithelial cell migration

ameboidal-type cell migration

negative regulation of cell motility

endothelial cell migration

regulation of epithelial cell proliferation

negative regulation of locomotion

negative regulation of cellular component movement

endothelial cell proliferation

negative regulation of cell adhesion

regulation of supramolecular fiber organization

actin filament organization

regulation of actin cytoskeleton organization

regulation of actin filament-based process
